DETAILED ACTION

1. This action is responsive to the Applicant's terminal disclaimer filed on 8/4/2005.
2. The terminal disclaimer filed on 8/4/2005 is acknowledged, and the double patenting rejection in the previous office action over co-pending application no. 09/657,661 is withdrawn.
3. Claims 1 – 21 are allowed.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

Prior art of record, taken either singly and/or in combination, does not teach or disclose a method as recited in independent claims 1 and 21, or a computer-readable medium as recited in claim 11 with the following features:

Providing a set of predetermined function definitions that define a function for manipulating image data; transmitting through a communications link a communication from a user that causes the storing and execution of a project definition at the receiving end of the communication link; and wherein the execution of the project definition operates to manipulate the image data according to the predetermined function.

The closest prior art is Fowlow et al., U.S. Patent 6,083,277, which discloses a set of predetermined functions wherein component A is different from other components B, C, etc., but

Art Unit: 2193

does not explicitly disclose manipulating image data, or transmitting through a communications link a communication from a user that causes the storing and execution of a project definition at the receiving end of the communication link wherein the execution of the project definition operates to manipulate the image data according to the predetermined function.

Thus all remaining dependent claims 2 – 10, and 12 – 20 are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
